

Computing Long Term Vision – Intent, Implementation, Impact

Intent	That all children and staff within the school will be confident and competent users of technology and see its purpose and various uses within all areas of life.
Implementation	<ul style="list-style-type: none">• An innovative, cumulative and personalised curriculum, with real life experiences appropriate for key stage will provide experiences and develop character and talent within computing.• Opportunities to draw links between subjects will be available during discreet computing lessons and within ID time (for example links made to history using technological artefacts) so that computing is embedded within the curriculum across the school.• Provide all children with the understanding of how to respect technology and for their own and others online safety (see e-safety policy).• The bank of computing resources within the school will be continuously expanding with the support of the school's Parent and Teacher Association (Friends of Downs View) and grants and match funding will be applied for.• CPD provided where a need is identified to ensure that all staff are confident in delivering computing.
Impact	That all children will have the opportunity to make expected or greater than expected progress within computing, from their baseline set in term 1 of each year enabling children to foster a life-long love of learning of which computing is embedded within.
